

## RFID HARD TAG HT025

### MARKETS:

Industry

Logistics

### COLOUR:

Black

The HT025 is a **"button tag"** made from nylon, a material that's both thin and strong, offering high resistance to shocks, chemicals, and bacteria. This **incredibly small, round, and ultra-thin RFID tag** has a diameter of just 16.2 mm, a thickness of 1.35 mm, and weighs a mere 0.3 grams! It's designed to be **applied** with adhesive **to small, non-metallic objects**. The HT025 is available in black with an **ICODE SLIX chip for HF** (High Frequency) applications. You can add your logo to the button tag using either pad printing or laser etching, while numbering is applied via laser technology.

### MARKETS

With an IP68 rating, the HT025 button tag is highly resistant to dust and water jets. This makes it an excellent choice for **tracking and identifying products and articles**. It's particularly ideal for **discreet placement in confined spaces or for application on small items**, offering a robust and unobtrusive identification solution.

frequency 13.56 MHz

#### RFID features

Chip	Memory	ISO Standard	NFC Standard
ICODE SLIX	128 bytes - UID: 8 bytes	ISO 15693	Type 5 - tag compliant

#### Technical specification

<b>Application</b>	Non-metal surfaces
<b>IP rating</b>	68
<b>Dimensions</b>	ø 16.2 mm, h 1.35 mm
<b>Material</b>	Nylon
<b>Weight</b>	0.3 g
<b>Application method</b>	Adhesive
<b>Operating and storage temperature</b>	-25°C ~ +80°C

#### Customisation

<b>Colour</b>	Black
<b>Type of printing</b>	Pad and laser printing
<b>Type of numbering</b>	Laser technology
