

RFID LABEL LT005

MARKETS:

Industry

Industrial laundries

COLOUR:

White

The LT005 is an RFID label made from **nylon**, an ultra-lightweight fabric resistant to wear, tension, chemical agents, as well as mold and bacteria. Rectangular in shape, this label **measures 80 x 40 mm** and is applied by sewing it onto the garments to be identified. Customization can be done with a thermographic printer. It's available in white, in **UHF with the UCODE 7 chip**, and supports both US and European frequencies.

MARKETS

The LT005 is optimal for **inventory and supply chain management in the fashion industry**. It's also well-suited for application on textiles processed in **industrial laundries**, such as linens used in the Horeca sector (hotels, restaurants, cafes) and work and medical uniforms.

European frequency (EU) 868 MHz - US frequency 920 MHz

RFID features

Chip	Memory	ISO Standard
UCODE 7	0 bytes - TID: 12 bytes - EPC: 16 bytes	EPC Class 1 Gen 2
UCODE 7 US	0 bytes - TID: 12 bytes - EPC: 16 bytes	EPC Class 1 Gen 2

Technical specifications

Application	Fabric
Dimensions	80 x 40 mm
Material	Nylon
Application method	Stitching

Customisation

Colour	White
Type of printing and numbering	Thermography
