COLOUR:

Black

The WB010 is a **unisex** RFID wristband featuring a **nylon strap with an adjustable adhesive Velcro closure** for a comfortable and secure fit. Its ABS dial, available exclusively in a solid black finish, offers a printable surface for customisation via pad printing, while serialisation is precisely applied using laser technology. Equipped with a **UCODE 8 chip and supporting both European and US UHF frequencies**, the WB010 boasts an impressive read range of up to 3 metres.

MARKETS

With an **IP67** rating, the WB010 is waterproof and dustproof. Its adjustable closure provides both comfort and practicality, making the WB010 an ideal solution for access control and identification across a wide array of sectors. These include corporate settings like **businesses and hospitals**, as well as **hospitality and leisure venues such as hotels, recreational clubs, campsites, tourist villages, amusement parks, spas, and swimming pools.**

European frequency (EU) 868 MHz - US frequency 920 MHz
